

MICROPROSS Equips BCTC with EMVCo L1 Micropross Analog and Digital Test Benches for 3.0 Debug and Type Approval

10/29/2018

National Instruments Micropross announced today an **agreement with BCTC**, enabling them to perform for their customers debug and ultimately type approval sessions for their customers according to **the new EMVCo L1 3.0 standards**, using the Micropross Contactless Test Station.

Effectively immediately, customers can contact BCTC to reserve test sessions for evaluating the performance of their contactless readers (PCD) according to the new EMV 3.0 test specification, both analog and digital.

uses the CTS
for **EMV 3.0**
PCD testing

Darcy Dement, President of National Instruments Micropross, said, "This agreement with BCTC is significant for **the entire Asian PCD manufacturer ecosystem** looking to reduce certification costs and time to market. As a number of manufacturers already use the **Micropross Contactless Test Station** for EMVCo Contactless readers, these users will be able to prepare the EMV L1 certification of their products using their existing equipment, and then easily pass the official certification session at BCTC using the same test platform."

The vast majority of the EMV test laboratories in the Asia-Pacific region will be using the Micropross Contactless Test Station as their reference tester for the EMV test specification version 3.0.

An updated list of those Micropross equipped test laboratories can be found on the Micropross website.

Micropross BCTC with EMVCo 3.0

NI 为 BCTC 的 3.0 调试和型式认证提供 EMVCo L1 Micropross 模拟和数字测试台

新闻发布 - 2018 年 10 月 25 日：NI 今日宣布与 BCTC 达成协议，BCTC 将使用 Micropross 非接触式测试台，根据最新的 EMVCo L1 3.0 标准为其客户进行调试和型式认证。从现在开始，客户可以联系 BCTC 预约测试，遵照新的 EMV 3.0 测试规范（模拟和数字）评估其非接触式读卡器（PCD）的性能。

PCD testing

NI Micropross 总裁 Darcy Dement 表示，“整个亚洲 PCD 制造商生态圈都在力图降低认证成本以及缩短产品上市时间，因此 NI 与 BCTC 的这项协议对于他们来说意义重大。由于许多制造商已经使用过 Micropross 非接触式测试台来调试 EMVCo 非接触式读卡器，因此这些用户现在可以使用其现有设备来为产品的 EMV L1 认证做好准备，然后使用相同的测试平台轻松通过 BCTC 的官方认证测试。”

亚太地区的绝大多数 EMV 测试实验室将使用 Micropross 非接触式测试台作为 EMV 测试规范 3.0 的参考测试仪器。Micropross 网站上也更新了配备 Micropross 测试台的测试实验室列表。
