

Did you know that RTX has test equipment distributors as well as calibration and repair partnerships on a global scale?

In January 2022, We established a new collaboration with our distributor ACE solution (筑波科技) in Taiwan to handle calibration service as well.

ACE solution(筑波科技) has been the RTX distributor for Taiwan and China since 2011 and thus a natural choice. ACE offers calibration of RTX RF testers throughout the APEC area and has many years of experience in providing this service.
